**DETAILED ACTION**

***Election/Restrictions***

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-13, 66-73, drawn to an adjustment mechanism for a Bowden cable with a housing neck preventing distortion.

Group II, claim(s) 14-29, drawn to an adjustment mechanism for a Bowden cable with limiting means to limit relative movement between the threaded elements.

Group III, claim(s) 30-36, drawn to an adjustment mechanism for a Bowden cable with unthreaded portions within the threaded portions.

Group IV, claim(s) 37-46, drawn to an adjustment mechanism for a Bowden cable with a material recess.

Group V, claim(s) 47-53, drawn to an adjustment mechanism for a Bowden cable with.

Group VI, claim(s) 54-61, drawn to an adjustment mechanism for a Bowden cable with rounded threaded portions in parting surfaces of the half-shells.

Group VII, claim(s) 62-65, drawn to an adjustment mechanism for a Bowden cable with an opening in the unthreaded portions.

The inventions listed as Groups I-VII do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: The special technical features as briefly described in the above description of the groups are neither identical nor similar. Furthermore, the prior art reference EP 0774590 reads on at least some of the independent claims such as claim 14. Since there is no "special" or unique feature relative to the claim which is read upon then there can't be a common special technical feature among the groups.

**Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement may be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.**

The election of an invention or species may be made with or without traverse. To preserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
